Skills:

JavaScript/TypeScript

HTML/CSS/SCSS

React

Redux

Angular

A11y

SQL(PostgreSQL)

ML

Data Analysis

NoSQL(MongoDB,Neo4j)

UX/UI

Game Design

GIT

General:

Third-year student at the School of Digital Engineering (SDC), specializing in Frontend Development and Data Engineering.
I have a strong technical foundation in JavaScript/TypeScript, React, Redux, HTML, CSS/SCSS, and practical experience with SQL (PostgreSQL) and NoSQL (MongoDB, Neo4j). My growing interest in data systems led me to explore data modeling, ETL processes, and machine learning applications.

Mentoring experience

- Intern – EPAM Systems (UAB "EPAM SISTEMOS") Mentorship Program: Web Accessibility for Angular Applications

Languages

- Russian:native
- English:B2
- Lithuanian:A1

Hackathons and projects

-"Junction 2024"International hackathon ,Finland,2nd place from Peikko

-"Distortion" - Game Project
